

The Very Strange Day

by Maximilien

Seriously my very strange is the day when i do free fall indoor. This is a very strange day because i've a lot of sensations and i like the sensation to fly and it's fantastic. I 'm very stress but it was still a good expérience i liked but it's very difficult to find the balance.

One day my dad wake me up abruptly and he say : it's for your birthday ! I 've prepare and we left and after one heure after we are arrival in front of a very big hangar that i didn't know. We put on a jumpsuit but i didn't understand what i was going to do. We put on a physics chemistry teacher glasses and the organizers explained to me the safety rules witch was apparently are very very important. After we go in front of a very big tube and i must keep calm and enjoy to the max. And after two persons, it was my turn. I'm stress and impatient. And it was my turn and the sensation it's very cool and satisfaction. Then we go with my dad to do karting and i win and it's the end of the day.

And also the second very strange day is the day if i say that we could learn additional lessons in english. (i'm joking)
